MRS. ANNE S. COZZENS, B.A., M.A.

English

Mrs. Cozzens has terminated her career as a teacher at Arts after 26 years of dedicated service in this school. To her students she was much more than a teacher; she was a wise friend who had faith in her students and asked only that they work to capacity.

From Newark State Normal School Mrs. Cozzens received her teaching certificate. From New York University she received a Bachelor of Science degree and a Master of Arts degree. After teaching at Waverly Avenue School and Cleveland Junior High School, she came to Arts in 1932 to teach English and drama. She was unexcelled as a dramatic coach and many of her students have gone on to careers on the stage.

Now Mrs. Cozzens will be able to devote her time to attending the theater, playing golf and working in her garden.

DEDICATION

We humbly dedicate our Vignette to two former faculty members in grateful appreciation of the kindness, patience, and guidance which they so generously extended to the students of Arts High School during their many years of loyal service.

MR. ROY PERRY, B.S.

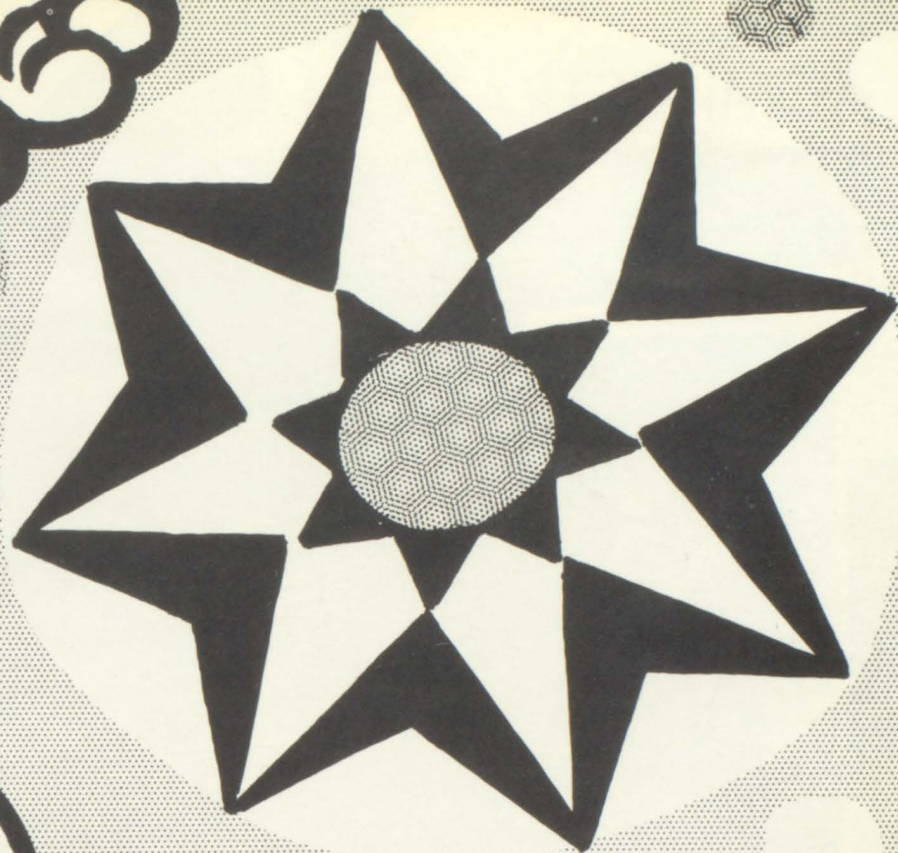

Science

Now that 23 years of service in Arts High have come to a close, Mr. Perry ended his teaching career. As a student he attended North Attleboro High School in Massachusetts and is a graduate of Rhode Island State College. Before becoming a member of the Arts High faculty, he taught at Market Street High School.

As a science teacher Mr. Perry worked diligently to make his subject vital and important. His numerous scientific experiments and his amusing stories stimulated interest among his students. He impressed us with his easy-going manner. Although calm, he was always firm in his decisions. His many years of devoted service will not be forgotten.

Always quiet and reticent, Mr. Perry will now retire to the peaceful comfort of his Ocean Grove home. Here he will spend his time furthering his scientific pursuits and enjoying the fine fishing grounds of the Jersey coast.

INTRODUCTION

The book which you are about to read is the culmination of a year's work—a year which has seen immeasurable advances in the scientific field. We have therefore chosen "outer space" as our central theme. It is our purpose to present an account of school life which will serve as a worthwhile tribute to Arts High School and its students.

ADMINISTRATION

FREDERICK C. SEAMSTER, Ph.D.
Principal

BEATRICE G. GELLER, B.A., M.A.
Vice-Principal

At the center of the universe is the sun about which all other planets revolve. Upon this sun so much depends. Its great gravitational pull holds the planets in their orbits. Its warmth and light sustain life in the entire universe.

Dr. Seamster and Mrs. Geller are our guiding light, our sun. They stand to light our way with the powerful rays of education.

Dr. Seamster is ready to begin a day's work.

"This is Arts High calling."

Now, what's your problem, young lady?

Personally speaking . . .

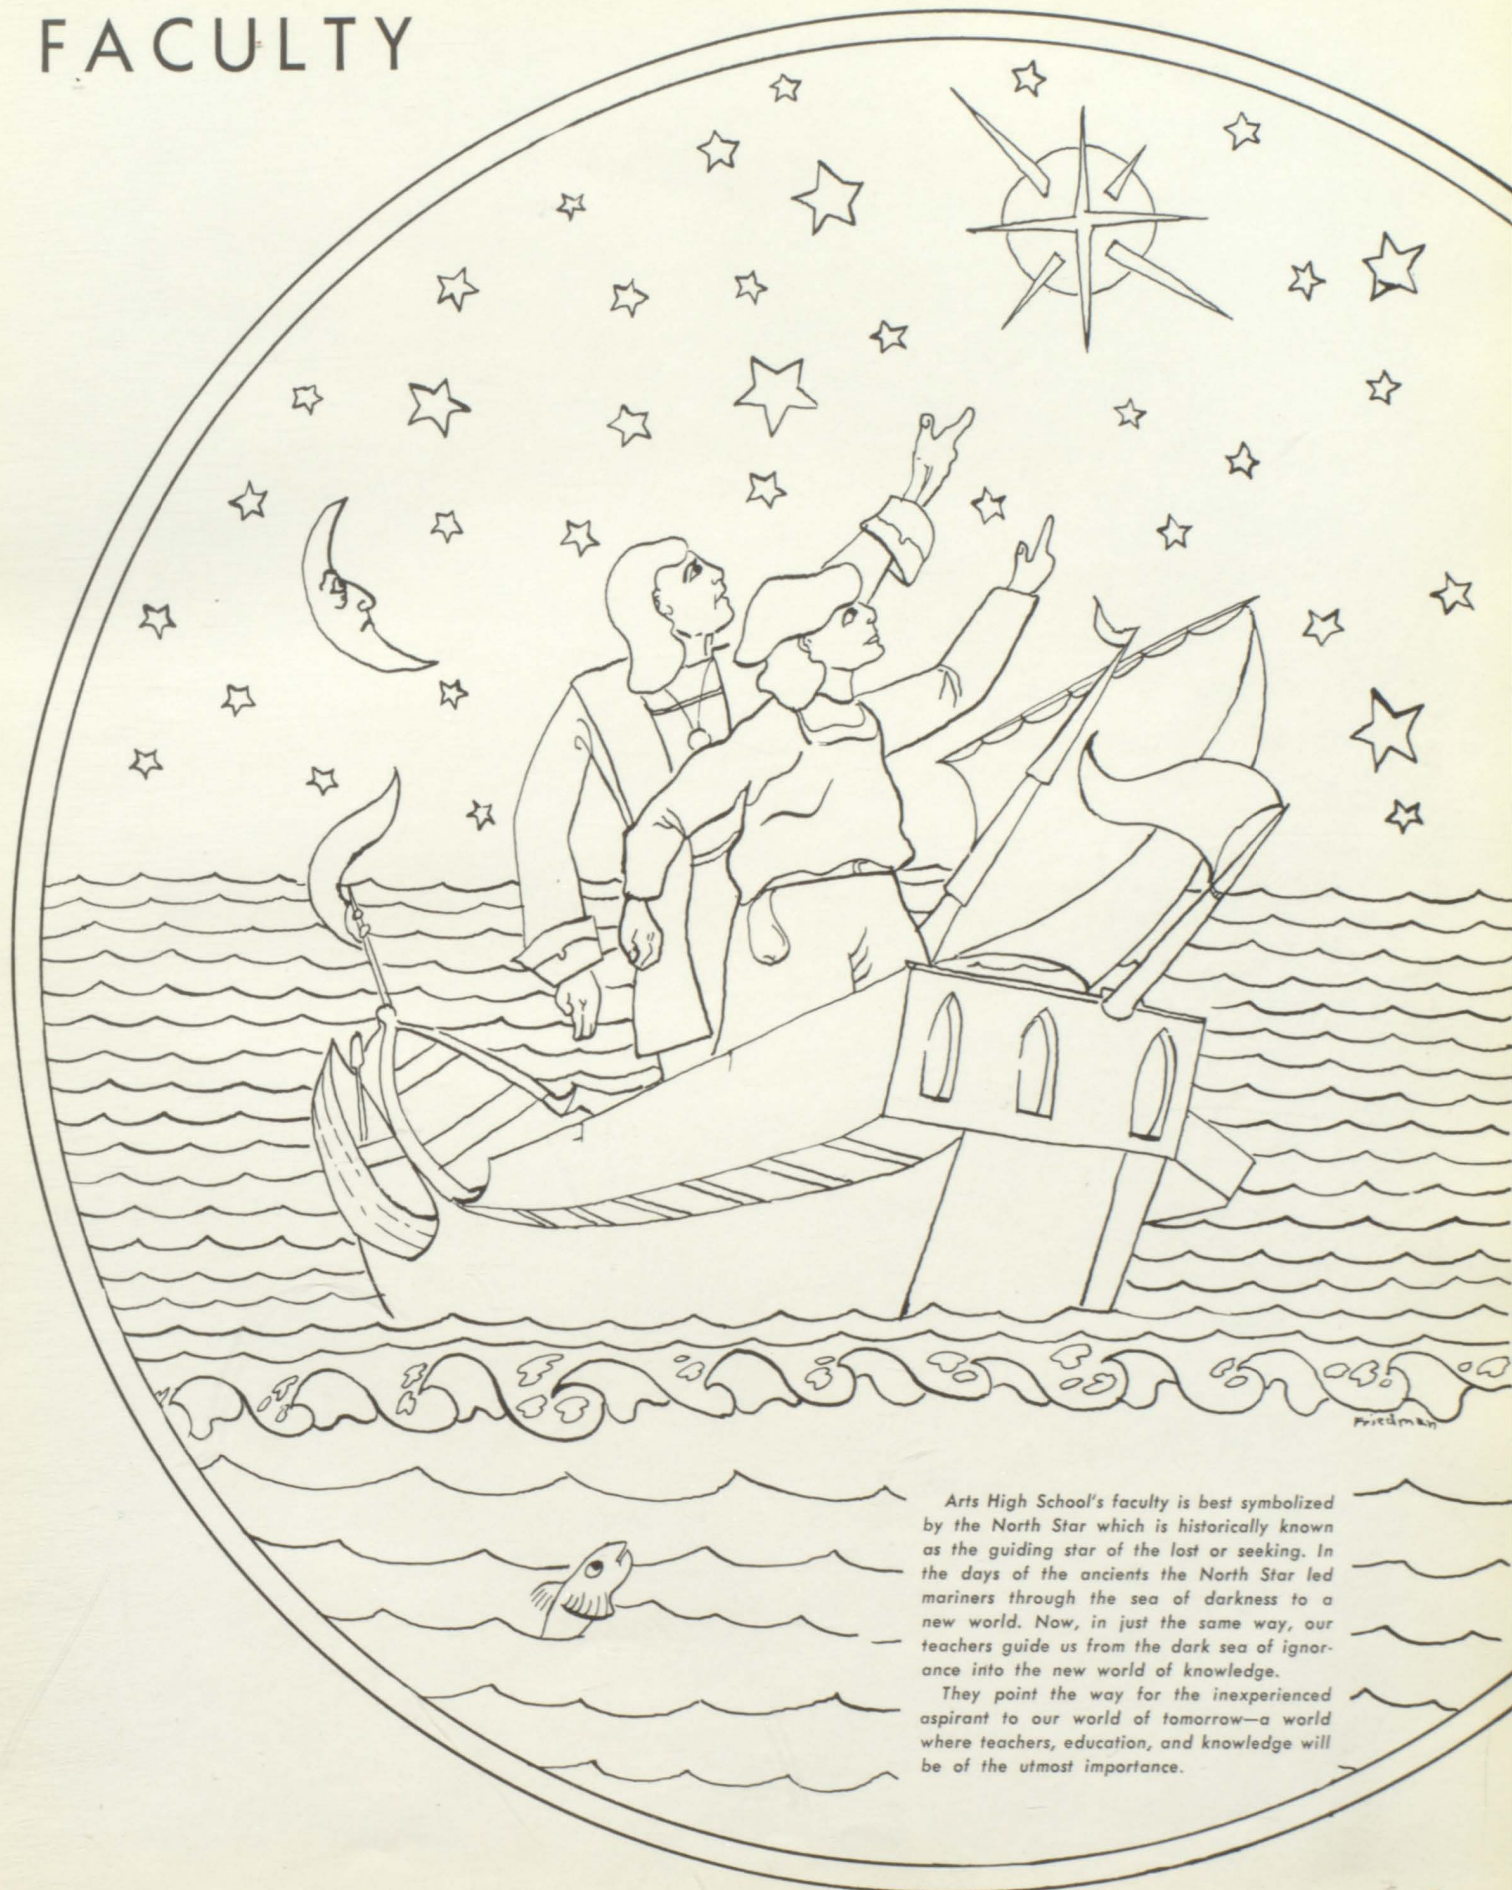

Your record proves you can do it.

*"Oh, no! It is an ever-fixed mark"
—Shakespeare's Sonnet 116*

FACULTY

Arts High School's faculty is best symbolized by the North Star which is historically known as the guiding star of the lost or seeking. In the days of the ancients the North Star led mariners through the sea of darkness to a new world. Now, in just the same way, our teachers guide us from the dark sea of ignorance into the new world of knowledge.

They point the way for the inexperienced aspirant to our world of tomorrow—a world where teachers, education, and knowledge will be of the utmost importance.

"I'm sure you'll particularly like the friendliness of Arts High's students," says Mrs. Longley.

"I wonder if I'll stutter when I get up there?"

FRESHMEN ORIENTATION

The first event of our school year is the Freshmen Orientation, sponsored by the Student Council to help the Freshmen to get acquainted with other students and with the activities of the school. During an assembly program a representative of each extracurricular organization tells something about the program of activities offered by his club.

At the conclusion of the program the new students are escorted into the gym to chat, dance, and enjoy refreshments. The Arts High "Greenjackets" supply the music and Student Council representatives help the new students get acquainted. They also supply answers to the many questions asked by these enthusiastic new Arties who choose carefully the clubs best suited to their needs and interests.

Students listen attentively to the announcement, "Refreshments will be served in the gym."

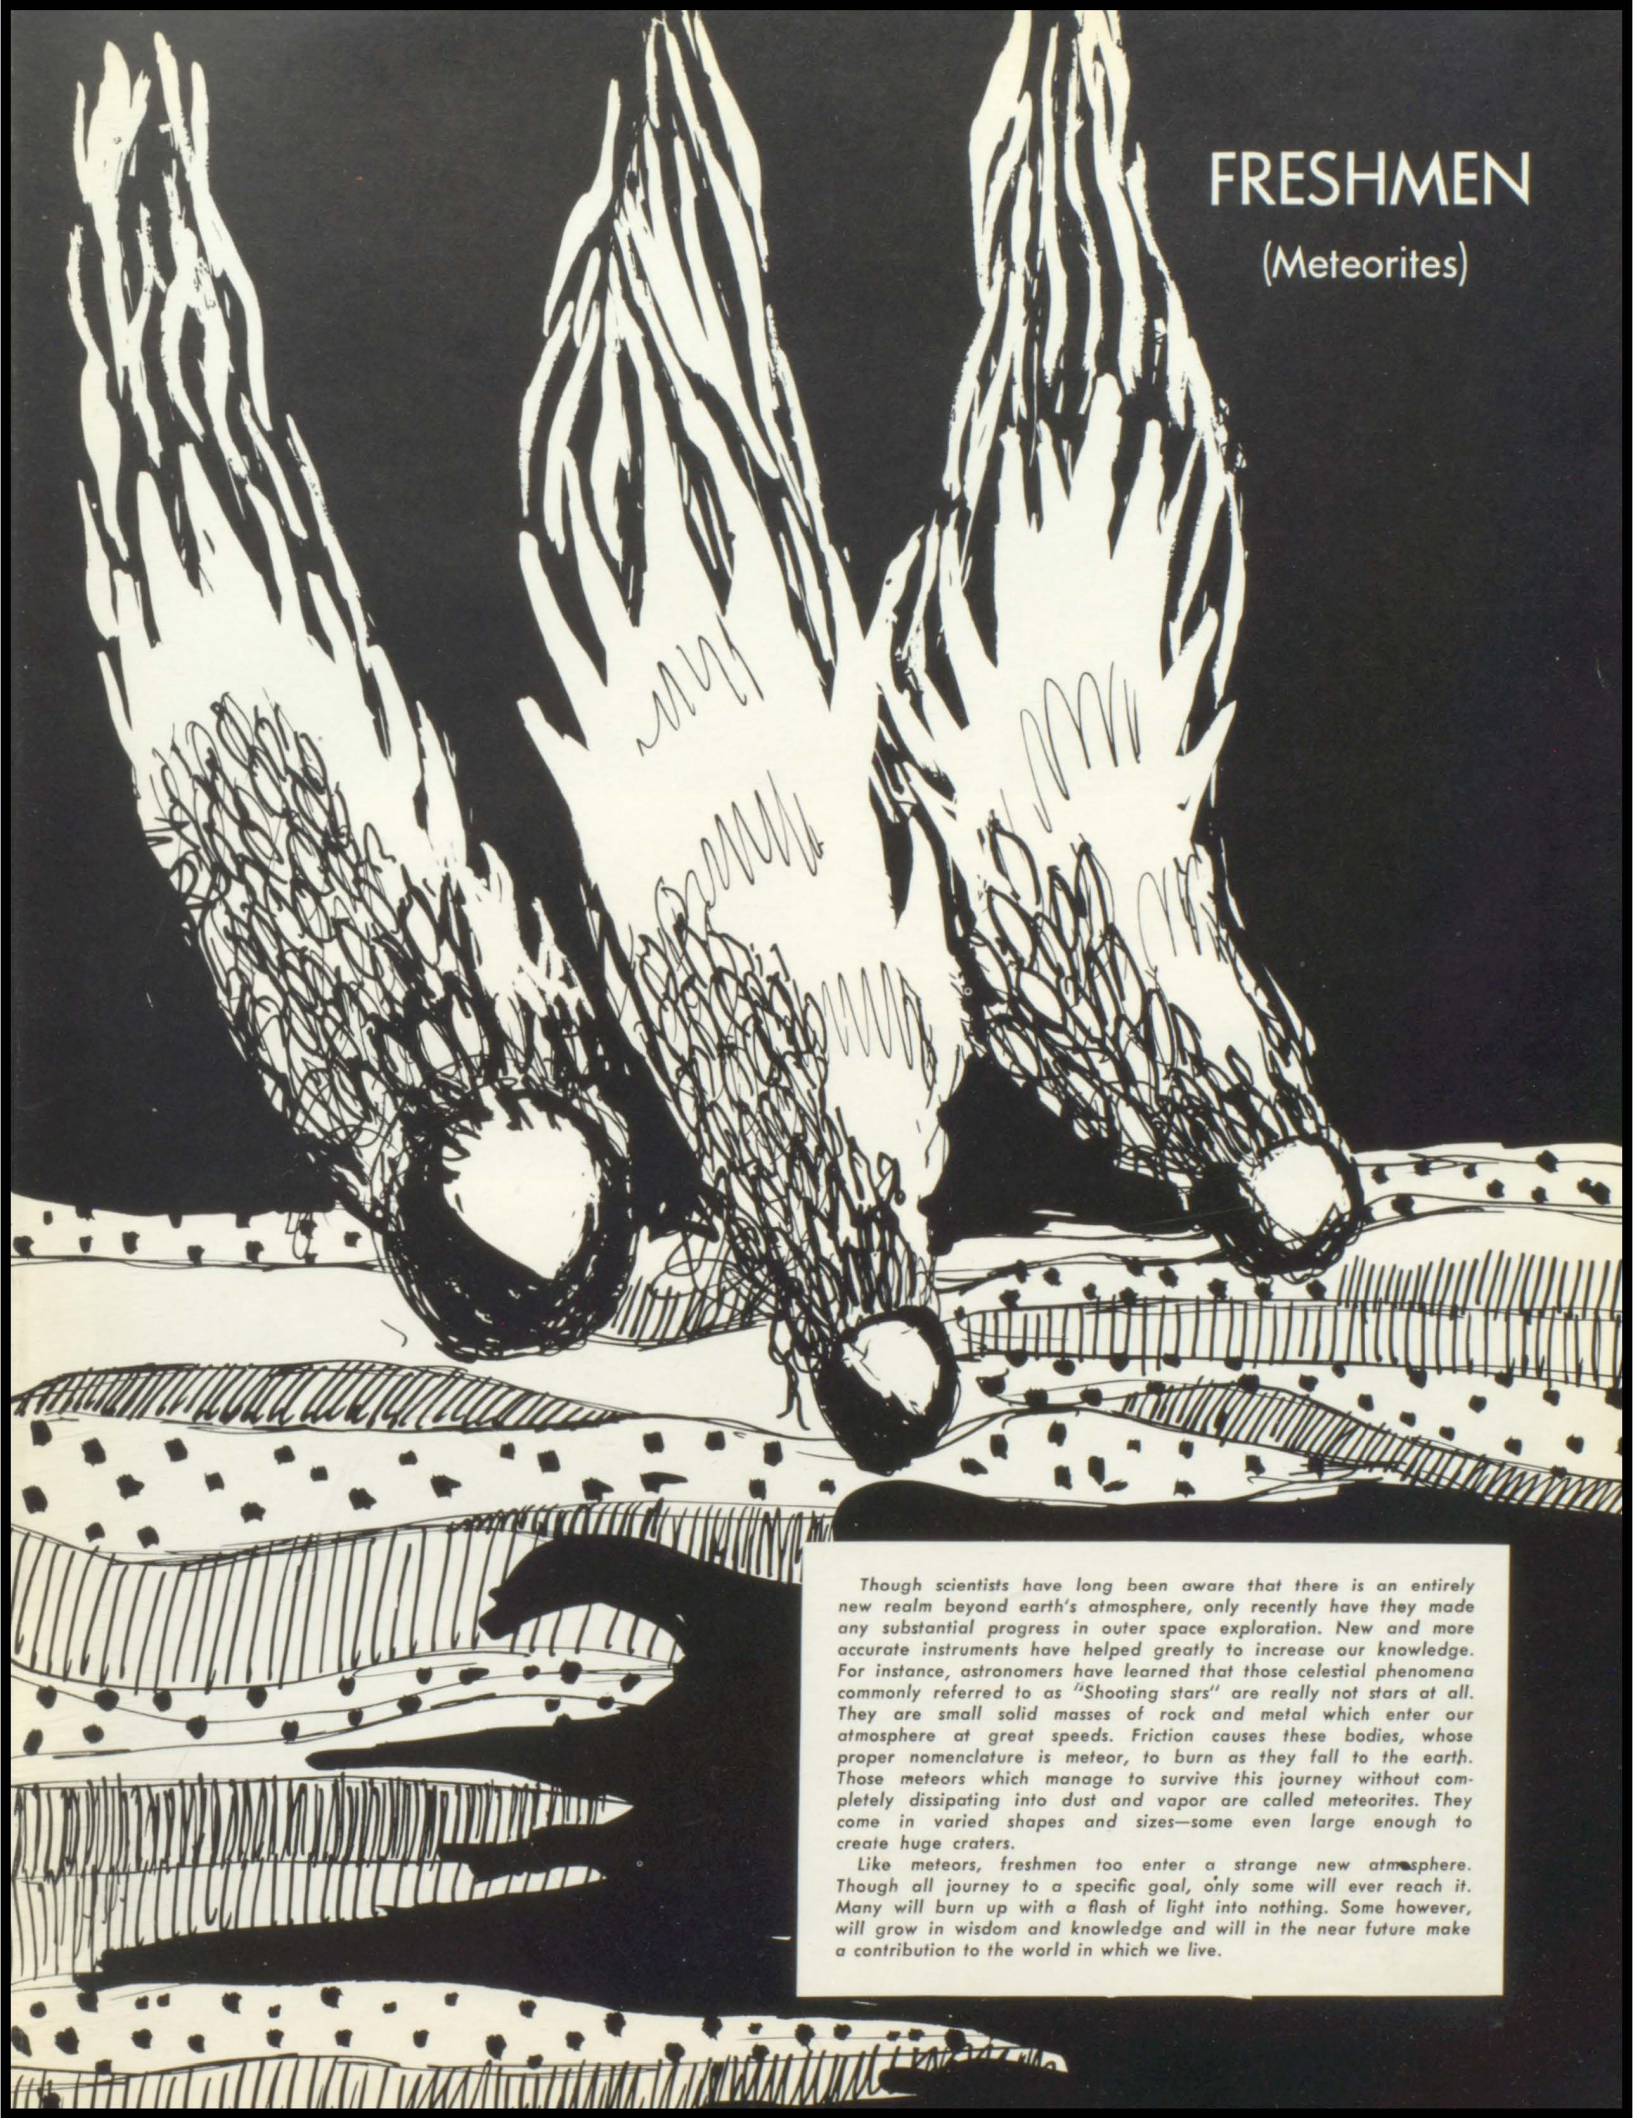

"Robert, this is your third!"

"1-2-3-4, 1-2-3-4, whoops! Sorry!"

FRESHMEN

(Meteorites)

Though scientists have long been aware that there is an entirely new realm beyond earth's atmosphere, only recently have they made any substantial progress in outer space exploration. New and more accurate instruments have helped greatly to increase our knowledge. For instance, astronomers have learned that those celestial phenomena commonly referred to as "Shooting stars" are really not stars at all. They are small solid masses of rock and metal which enter our atmosphere at great speeds. Friction causes these bodies, whose proper nomenclature is meteor, to burn as they fall to the earth. Those meteors which manage to survive this journey without completely dissipating into dust and vapor are called meteorites. They come in varied shapes and sizes—some even large enough to create huge craters.

Like meteors, freshmen too enter a strange new atmosphere. Though all journey to a specific goal, only some will ever reach it. Many will burn up with a flash of light into nothing. Some however, will grow in wisdom and knowledge and will in the near future make a contribution to the world in which we live.

CLASS OF JUNE 1962

There must be an easier way to get an A in Art.

The chorus joins Aida, Amneris, and Radames in praising Radame's return.

The slave girls brought back from Ethiopia dance to the pagan rhythm of the orchestra.

AIDA

The high priests and priestesses sing praising their god, "Almighty Ptha."

The chorus shouts "guerra! guerra!" to tell of Radame's victorious return.

The chorus sings "Su! del Nilo" in the great Triumphal scene.

Look at that crazy mixed-up romance.

Trial by Jury

The bride is sad over her lover's sudden change of heart.

"Comes the broken flower, comes the cheated maid . . ."

"Order in the court! Order in the court!!!"

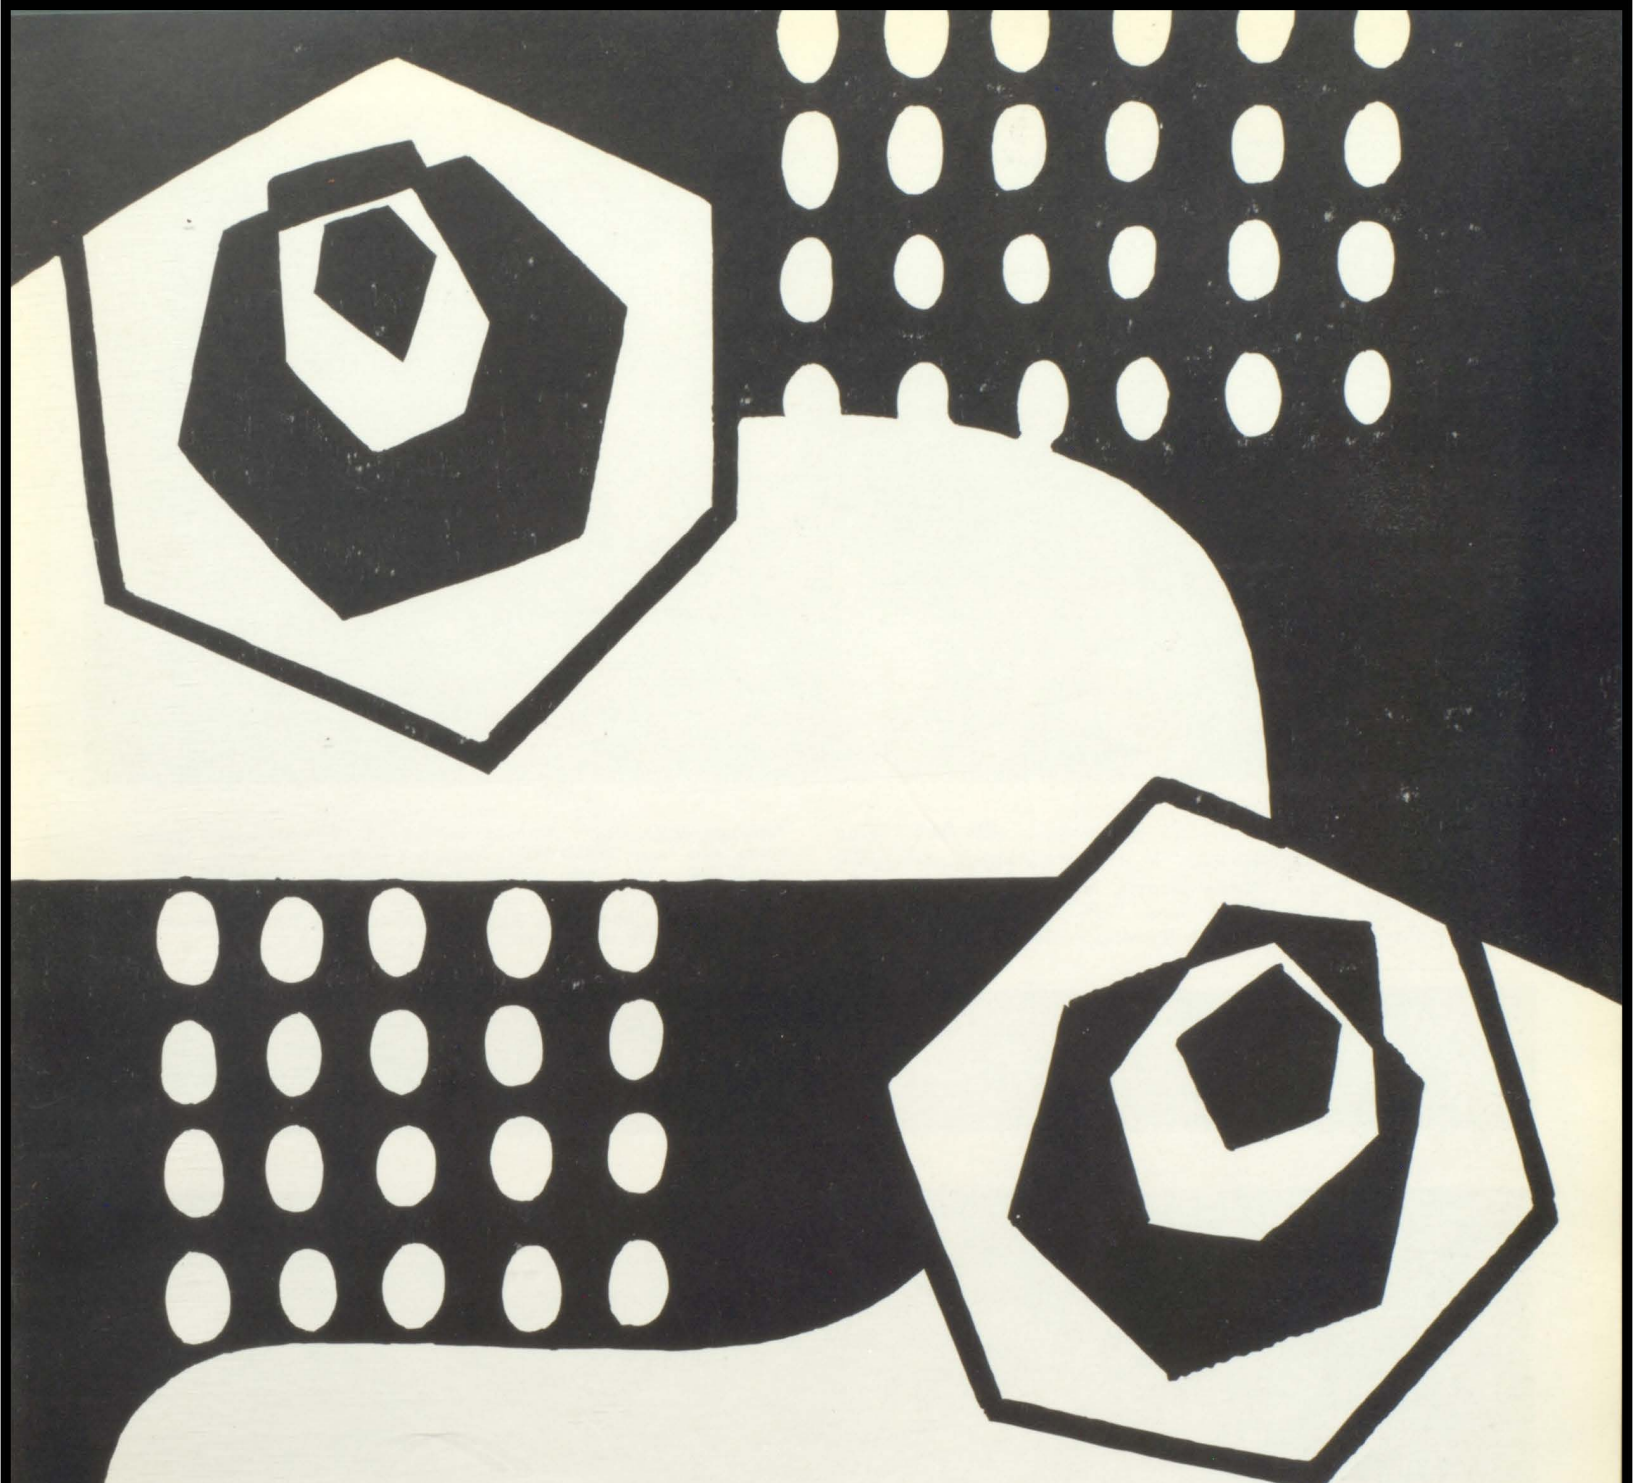

"Ring around the rosie, all fall down."

Sometimes it is good to look at life from a different slant.

An abstract geometric design featuring two large, concentric hexagonal shapes in the upper left and lower right corners. The background is divided into sections by a horizontal line and a curved shape. A grid of white circles is visible in the upper right and lower left areas.

SOPHOMORES

In the early part of the nineteenth century, an Italian astronomer discovered asteroids among the myriad heavenly bodies. Invisible to the naked eye, these minor planets revolve around the sun between Mars and Jupiter. Smaller than planets, larger than meteors, they live in starlike obscurity in the heavens. So it is with the Sophomores at Arts High School. These "asteroids", heads and shoulders above the Freshmen, but not as lofty as the Juniors, travel higher and higher, faster and faster to reach their goal.

"Cream for your coffee, Sweetie!"

"There goes my Heart."

Dressed to kill, Mr. Lang calls "Peek-a-boo!"

"Dos-a-Doe and around you go!"

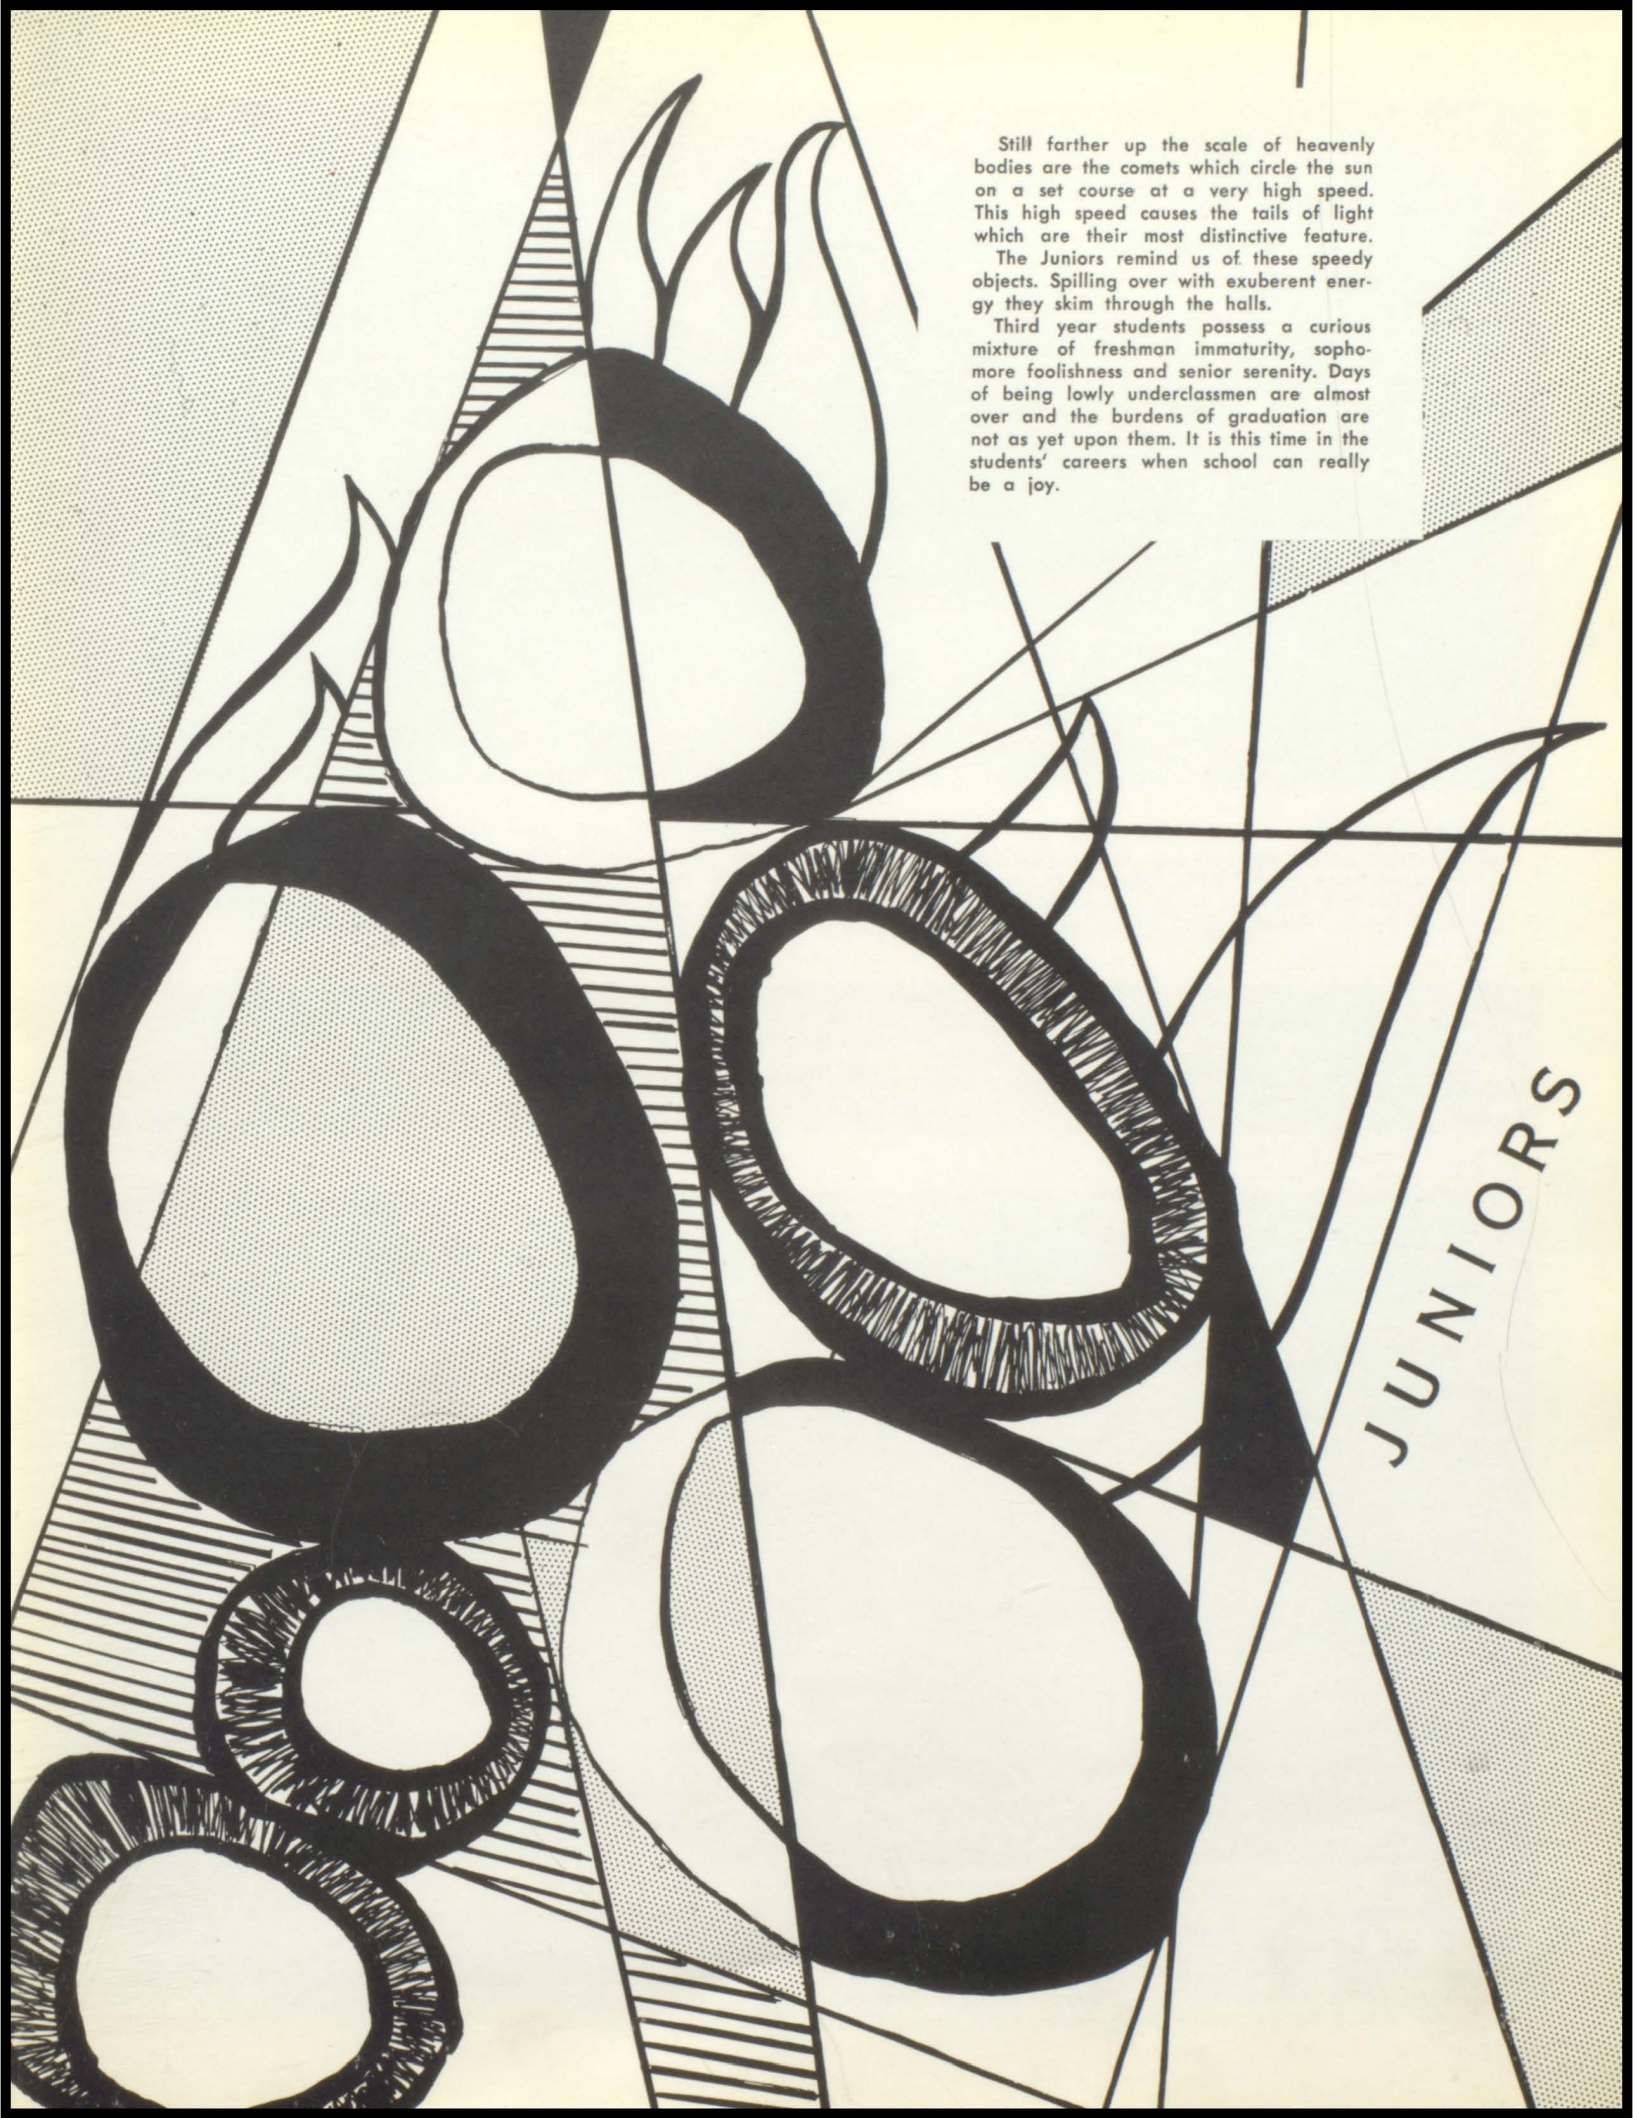

"At twelve I turn into a math teacher."

*"Listen to the music; listen to the call;
All join hands and waltz the hall."*

*"Head and every other couple down the outside

Still farther up the scale of heavenly bodies are the comets which circle the sun on a set course at a very high speed. This high speed causes the tails of light which are their most distinctive feature.

The Juniors remind us of these speedy objects. Spilling over with exuberent energy they skim through the halls.

Third year students possess a curious mixture of freshman immaturity, sophomore foolishness and senior serenity. Days of being lowly underclassmen are almost over and the burdens of graduation are not as yet upon them. It is this time in the students' careers when school can really be a joy.

SPORTS

The astronomer uses a very powerful telescope to search for the stars in outer space. At Arts High School, however, that feat is much easier. We only have to look about us to find a countless number of "stars," our athletes who serve as shining examples of the spirit and ability possessed by our student body. Our sportsmen glow with the sense of fair play that has won for them the admiration and respect of the entire city. The magnitude of talent and ability displayed by Arts in competition exceeds the brightness of the astral bodies. Our team members really make Arts a "starring" school.

BASEBALL

"It's my turn for a homer."

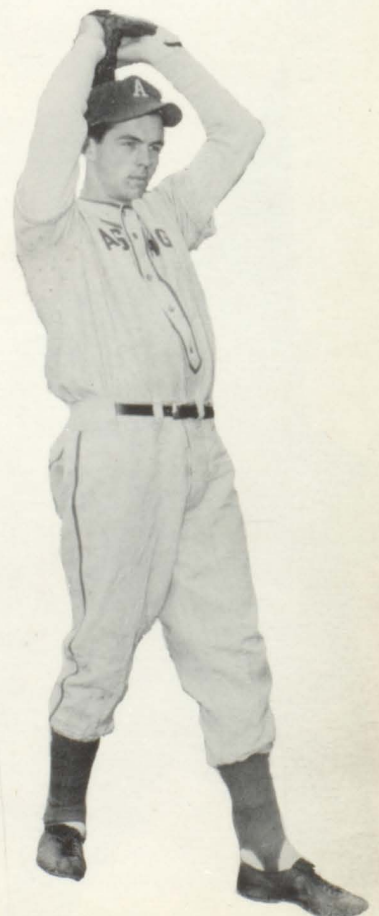

The 1958 season proved successful, the Arties winning 9 out of 15 games. Highlighting the year was the double victory over powerful Newark Tech. On the mound hurling for Arts were veteran southpaws Roger Brown, Frank Votto, and John Delk. Power packed slugging by Lou Venturi and Arnold Nash led the Green and Gray out of many a tight situation. At the season's end Ron Venturi was chosen as short stop on the All-Newark second team.

Behind the team all the way and largely responsible for its success is Mr. Morris. Besides building morale and coaching, he keeps the team in shape and is regarded by each player as a sincere friend.

BASKETBALL TEAM

The basketball season starts officially in the latter part of October and ends in March. This year we had a rather successful season, the outstanding players being Frank Votto, Ronald Venturi, Robert Brennen, and Reginald Douglas. Arts High will suffer a great loss by the graduation of Edward Shelton, Bill Caruso, William Lund, Kenneth Ghorm, Ronald Venturi, and Frank Votto. However, the coaches are looking forward to next season in anticipation of another successful year.

The swimming season runs from December to March 15, with practice meets three days per week. This year's practice resulted in a fairly good showing. Neil Travisano, John Paul, and Gene Geldziler were the outstanding competitors for Arts High. Kevin Marks and Mario Abate also made worthy contributions.

TRACK TEAM

Early in the spring the Track Team organizes and begins an exhaustive training so that members are ready for competition. Mr. John Lang unselfishly devotes his after school hours to coaching the track candidates. After long hours of running, pacing and throwing the javelin and shot-put, the team is ready for the series of meets. With co-captains Nick Di Guiseppe and John Fudge, and veteran William Lund in the running, the season looks bright. Major wins are predicted.

ACTIVITIES

The galaxy, the Milky Way, is comprised of billions of stars, each of a different brightness, all contributing individually to one great system. Here at Arts High School our galaxy is the extracurricular program to which each student can add his own "brightness" to his chosen activity. At the beginning of the day, during the day, and at the close of school, many students are busy learning new techniques, polishing acquired knowledge, and occupying their time in profitable relaxation.

Arts High Christmas rush.

CHRISTMAS FAIR

"Four score and seven fairs ago."

"Who'll buy a beanie?"

This is worse than Times Square on New Year's Eve.

"Glory to God in the highest."

"And the Wise Men came from the East and worshipped Him."

"Lo, the star shone round about them."

Mrs. Assarsson assists students with last minute costume adjustments.

The annual Christmas Fair is the event to which parents, alumni, and friends are invited to see and purchase the articles the students have learned to make. This affair gives both the music and art department and practically every club a chance to participate. A significant part of the program is the dramatic and colorful presentation of the religious tableaux whose magnificence is increased by the chorus music. Certainly this is one tradition that should continue as long as Arts High does.

Once the solemn tableaux have ended the colorful fair reopens. The spirit of the festive season fills the air. Through the hustle and bustle visitors quickly purchase home-made cakes, jams, and jellies. Jewelry, ceramic and novelty items and other student-made articles are attractively displayed throughout the gym. As the evening draws to a close the Christmas spirit is a-glow and the bedecked fir tree twinkles brightly.

Nothing is so difficult but that it may be found out by seeking.
 —Terence (Heauton Timoroumenos; Act III, Scene 2, line 7)

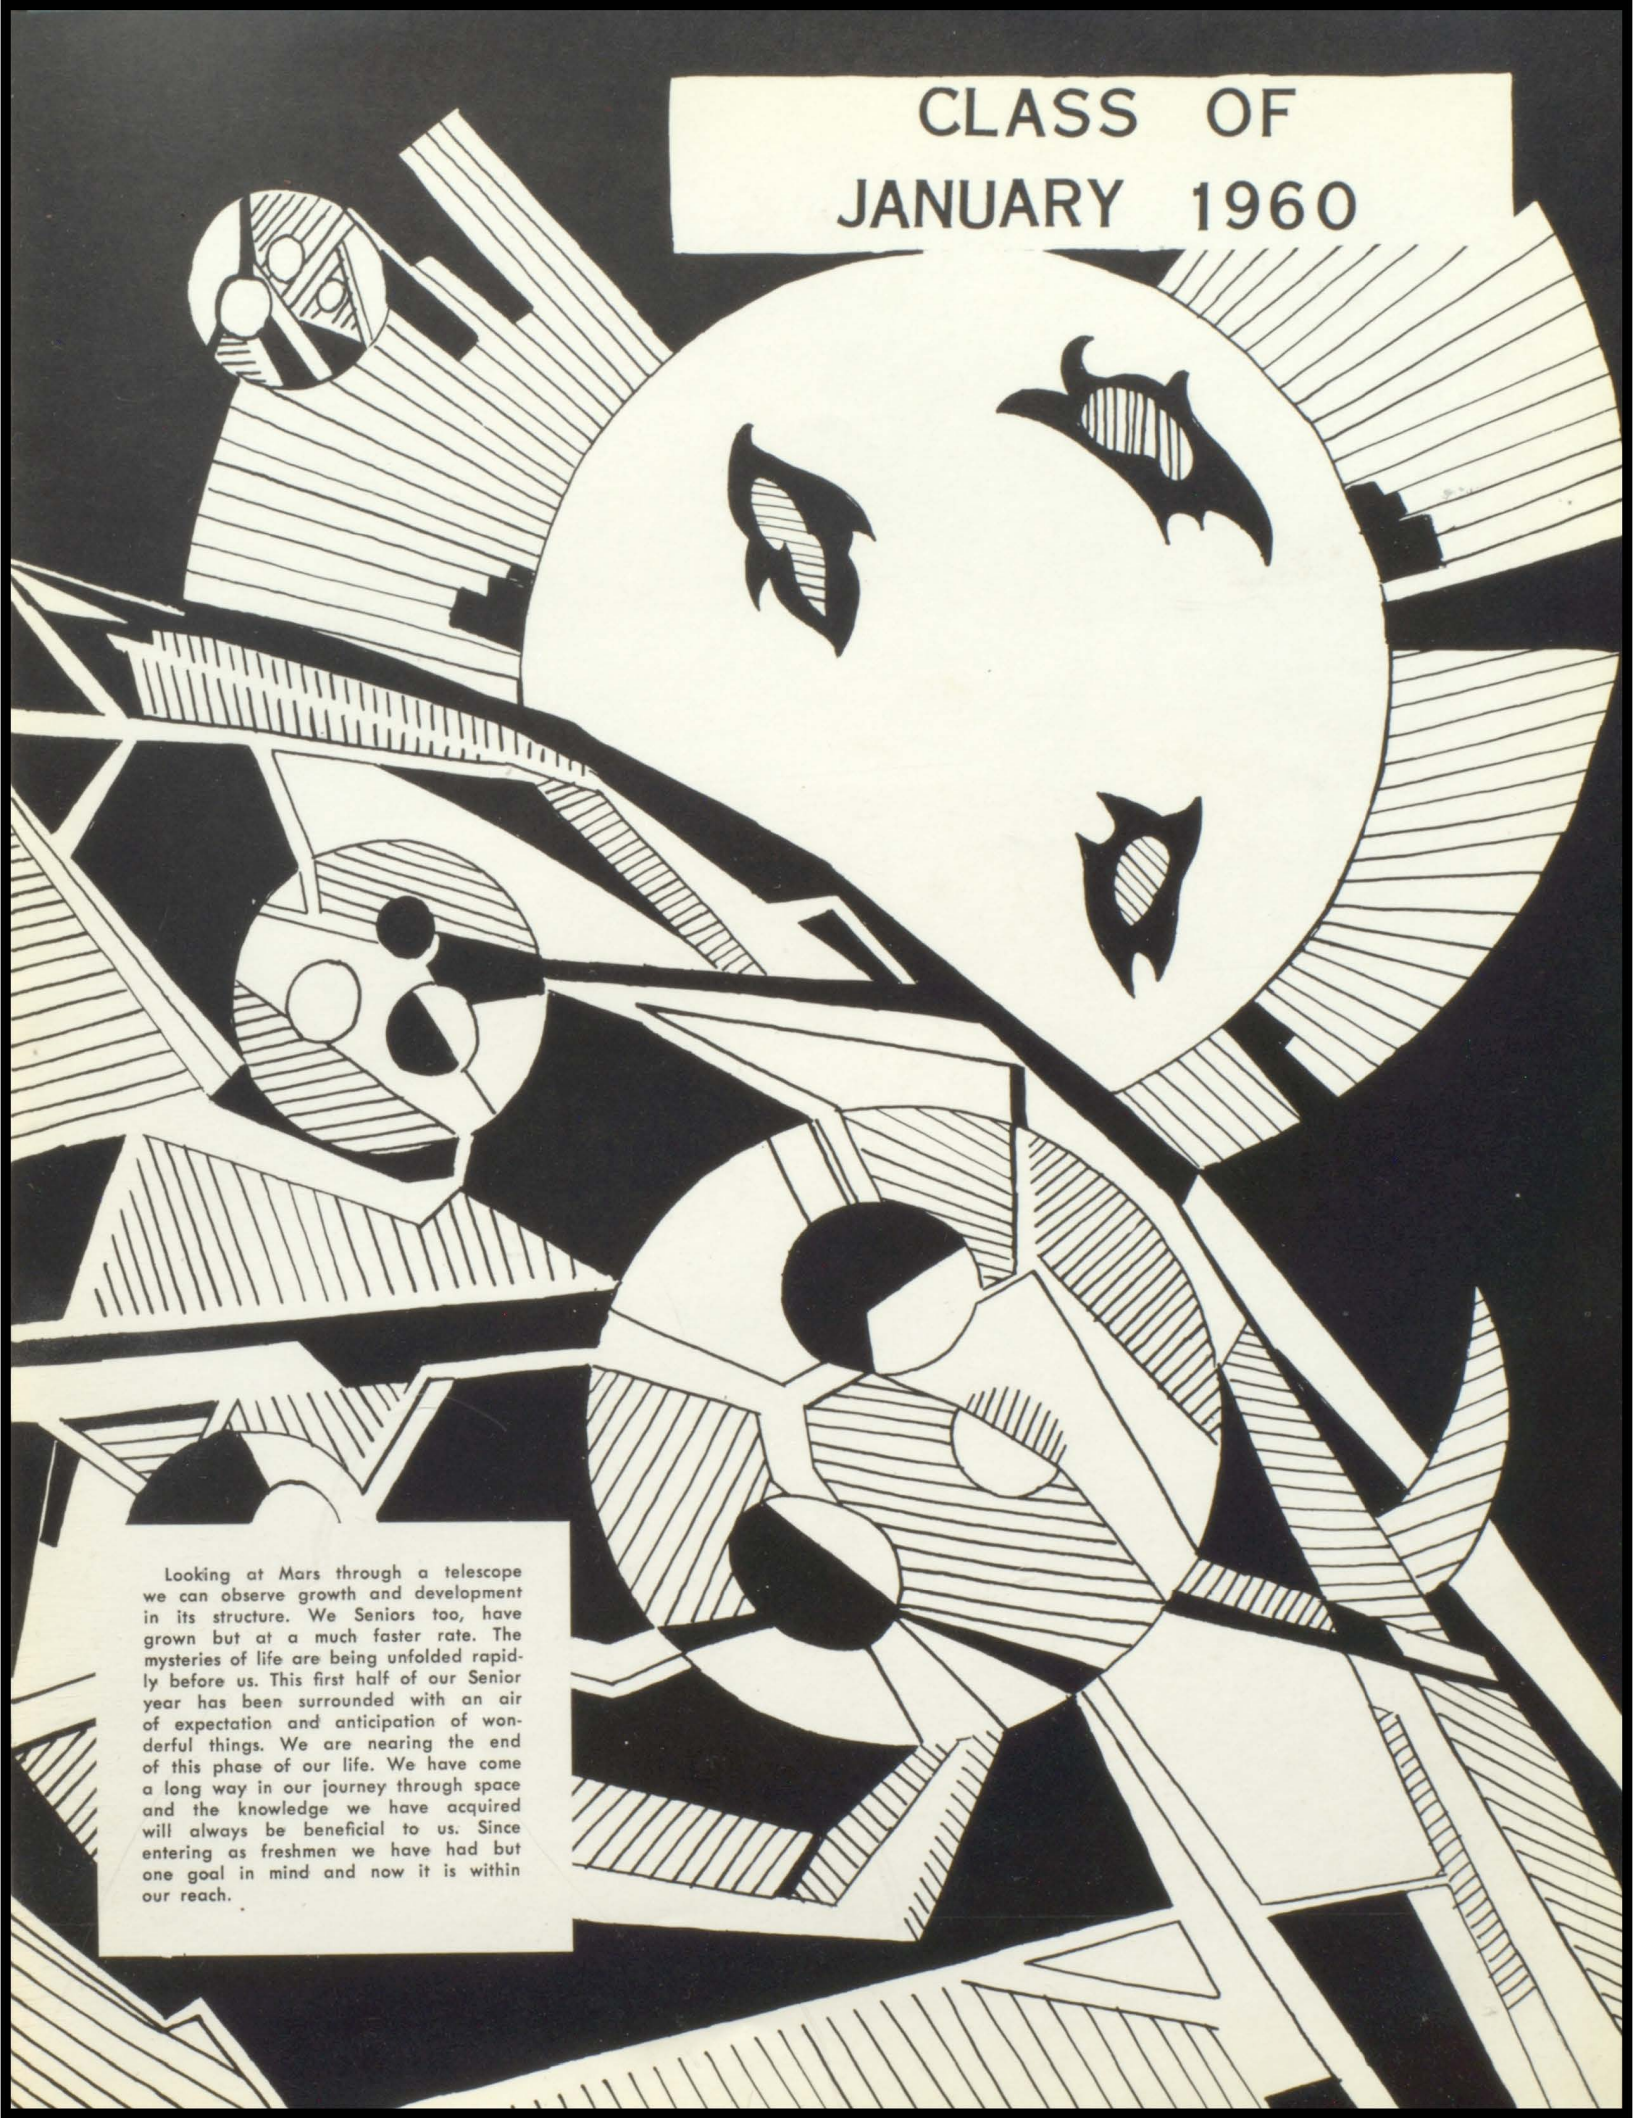

No, dear, parallel perspective has nothing to do with geometry.

Yes, Kenny, I can play "Chopsticks."

ALLEGRETTO

ALLEGRO

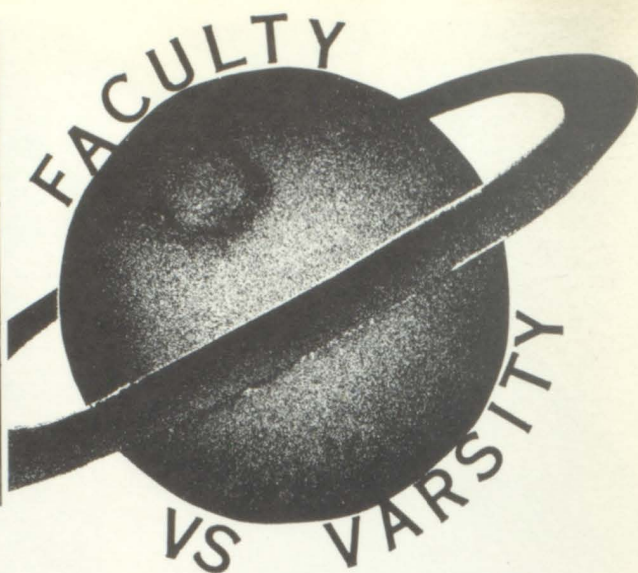

PRESTO

ANDANTE

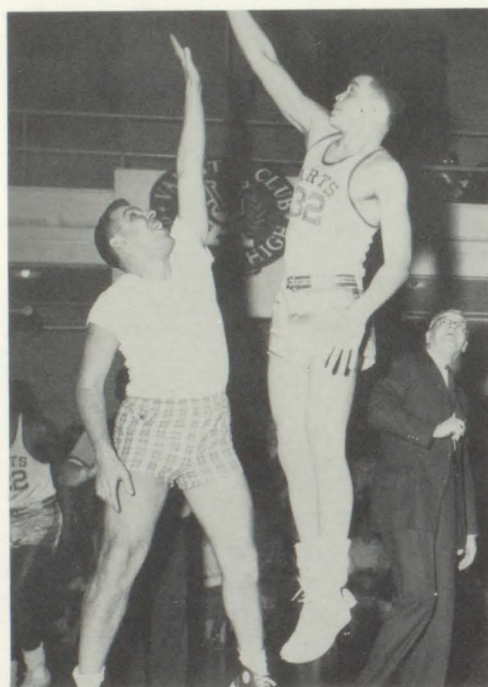

Just a flick of the wrist and Frank's A in gym is gone.

Excuse me—this is a private conversation!

My, Edward Shelton is tall!

And now from the House of Dior we have . . .

It's anybody's ball.

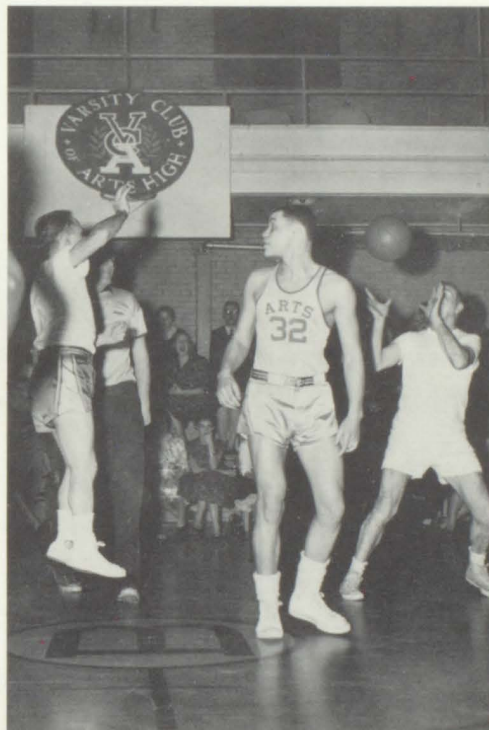

The Line-up

"If Votto can do it, so can I,"
says Mr. Morris confidently.

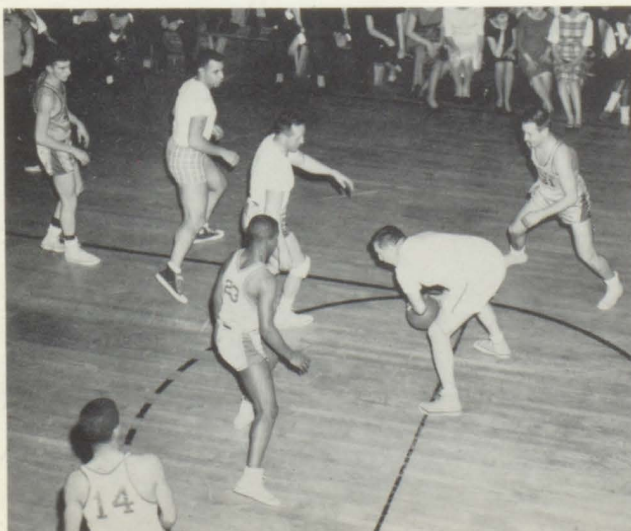

"Basketball gives me a lift!"

Stop waltzing and play ball!

"It's mine, and you can't have it."

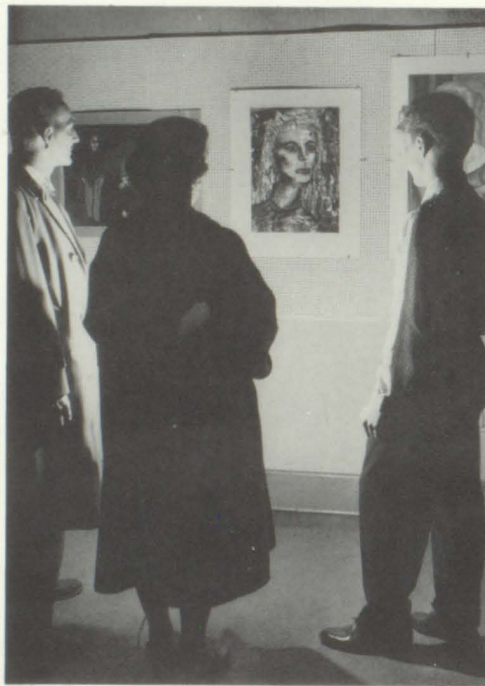

"Big Chief Wahoo, Little papoose"

Sculpture by Dean Ingram.

Friends admire a portrait by Donald Brown.

Arts High's "Class of 1970" seems more interested in his picture than in the work of the artist.

Pictures provoke thoughtful response.

"I suppose you're all wondering why I asked you to meet me here."

Neil is ready to "enlighten" the audience.

The mellow tones are heard throughout the auditorium.

Just a few minutes until curtain time.

Mr. Tobia gives last minute instructions.

Are you sure we got off at the right place?

CLASS OF JUNE 1959

SENIOR A

For the past four years we have continually soared upward. Through time and space we have journeyed, acquiring knowledge along the way. Our strides forward have brought us to the foremost planet, Earth. Although Earth is superior to all other planets, many questions still remain unanswered. In the past decade scientists have made outstanding progress in all phases of life. Soon it will be up to us to contribute to this body of knowledge. Our education does not cease with the close of our senior year. This is but a foundation for further education. If we use our knowledge wisely, we will enjoy the satisfaction of accomplishment, of outstanding achievement, and of service to our fellow man.

In Memoriam

JAMES W. LOWRY

B.S., M.A.

Science

In 1919, Mr. Lowry received a Bachelor of Science Degree from Bucknell University, and in 1931, a Master of Arts Degree from Columbia University. He became a member of the faculty in 1931, when Arts High School opened. In 1956 Mr. Lowry retired and moved to Florida.

Death took from Arts High one of its most beloved faculty members but left in our hearts a warm and living memory. That educator and friend was James W. Lowry, teacher of biology, chemistry and science, and that memory, intangible though it is, will always keep Mr. Lowry close to us.

His consuming interest in his work inspired the same response in his students. He worked tirelessly to educate his classes and develop in all students a love for extracurricular activities, which he himself displayed throughout his teaching career. Under his guidance the Radio and Photography Clubs functioned successfully for several years.

All those fortunate enough to have known Mr. Lowry will always remember him with affection and respect. He was a loyal friend and a conscientious teacher.
